and Teachers

Session 3:

Supporting English Teaching in a Changing Digital Landscape

Our Focus for this Session is to:

- explore current guidance on digital technology in schools including recommendations from the DEY and SEC, and consider what this means for English teachers in practice
- demonstrating practical ways digital tools can support teaching and learning in English, including strategies for inclusion, department planning, and assessment at both Junior Cycle and Senior Cycle
- provide time for teacher planning with digital tools to support future English lessons and classroom practice.

Thinking About Digital Technology

Individually - Which statement sounds most like you?

- I'm interested and would like practical ideas.
- I'm not sure yet — and that's perfectly okay.
- I'm still trying to understand what these developments mean.
- I've already experimented with several tools.

As a department - Complete the Sentences

Digital tools might help us to...

Digital tools should never replace...

Students still need to learn how to...

Digital Technology and AI in Education

Artificial Intelligence

Gen AI

- *AI is not the finished product, it may compliment but never replace our **voice, knowledge, agency** and **creativity**.* - UNESCO ROSA Director Nisha
- *It's goal will always be to **redirect** our time and focus as educators of the **many**, back to the needs of the **individual**.* - Prof. Dylan Wiliam
- *Gen AI is a tool. The real question is how (**or if**) we use it.* - Satya Nadella (Microsoft CEO)

Irish Policy Landscape

What do These Policies Mean for Reading, Writing, Speaking and Listening?

Oide

 Literacy & Digital Literacy	 Digital Strategy	 AI Guidance
 Critical reading	 Digital tools to support learning	 Critical evaluation of AI outputs
 Evaluation of sources	 Collaboration & feedback	 Ethical and responsible use
 Analysis of language & bias	 Accessibility & inclusion	 Human judgement and creativity
 Communication	 Assessment for learning	 Transparency and authorship

These policies highlight the need to develop adaptable, critically aware communicators who can navigate and contribute to a digital world responsibly.

Digital Tools and Inclusion

How might students demonstrate understanding in different ways?

Engagement

- Choice Boards
- Audio Supports
- Interactive Tasks
- Student Choice of Texts
- Podcasts
- Collaborative Discussion/ Modelling

Representation

- Read Aloud
- Translation Tools
- Immersive Reader
- Video Supports
- Visual Organisers
- Vocabulary Supports

Action & Expression

- Written Response
- Podcast
- Video Response
- Oral Presentation
- Digital Portfolio
- Creative Response

Guidance on AI in Schools

Department of Education
and Youth, 2025, p.8

- *provide teachers and school leaders with a **common understanding** of (Gen) AI, its **potential applications** in education and establish principles for its **responsible and appropriate use**.*
- *support teachers and school leaders in making **informed decisions** on the use of (Gen) AI, having regard to **safety and privacy** requirements.*

Using Digital Technology Responsibly: 7 Key Requirements

Oide

Ethical Considerations for Our Times

Oide

Fiction has always asked:

Who creates knowledge?

Who holds power?

What is authentic?

What does it mean to think?

Today, we might ask:

Who creates text?

Who controls the algorithms?

What counts as original work?

What does it mean to generate?

Text supports for 1984

AI, Authorship and Professional Judgement

Oide

Teachers

- Support learners to use AI critically and responsibly
- Encourage transparency about the use of AI tools
- Focus on the learning process, not just the final product

Students

- Use AI to support thinking, planning and improvement
- Evaluate AI outputs critically
- Acknowledge when AI has contributed to their work

Adapted from: State Examinations Commission
- Coursework Rules & Procedures 2025-2026

Consider: How might we support learners to make ethical choices when using these tools?

Where Can I Find Support?

Oide

Technology
in Education

What you'll find:

- AI in Schools Hub
- Webinars and online courses
- Classroom examples
- Digital tool guidance
- Data protection advice
- School self-evaluation supports

Oide

Post Primary English

What you'll find:

- English-specific professional learning
- Writing, oracy and literacy supports
- Junior Cycle and Senior Cycle resources
- Curriculum implementation supports
- Recorded webinars and exemplars

What you'll find:

- Digital literacy resources
- Online safety materials
- Critical media literacy
- Misinformation and disinformation resources
- Student and parent supports
- AUP generator

What Might This Mean for our Classrooms?

Oide

Reading

What might students need to learn to do differently?

- Critiquing AI-generated texts
- Evaluating reliability
- Identifying bias

Writing

What writing skills might students need to develop in a tech-supported world?

- Revising purposefully
- Preparing for assessment contexts
- Drafting/tracking

Oracy

What role might talk play in the modern classroom?

- Explaining thinking
- Defending viewpoints
- Engaging in dialogue
- Tracking progress
- Active listening

Assessment

How might we design tasks that value process as well as product?

- Greater emphasis on skills
- Drafting and reflection
- Encourage personal engagement

Using the RASE Framework to Support Department Planning

Oide

The video player interface shows the Oide logo and mission statement in the top left: 'Oide Tacú leis an bhFoghlaim Ghairmiúil i measc Ceannairí Scoile agus Múinteoirí Supporting the Professional Learning of School Leaders and Teachers'. The main title of the video is 'Using the RASE Framework for Stronger Professional Learning to Support Department Planning'. A large play button is centered over the title. In the bottom left corner of the video frame, there is a small circular icon with a right-pointing arrow.

Click to play

Using the RASE Framework to Support Department Planning

Oide

Focusing on an end of Unit Tasks, explore what variations you might add to the learning experiences and tasks using the RASE Framework:

Step 1 –

ROLE

Ask the AI to act as:

- an English teacher
- a curriculum designer
- an expert in formative assessment
- a UDL specialist

Step 2 –

ASK

State your objective.

Example:

- Help me design learning experiences that prepare students for this end-of-unit task.

Step 3 –

SPECIFIC

Include:

- year group
- learning outcomes
- text(s)
- student needs
- assessment focus
- inclusion considerations

Step 4 –

EXPERIMENT

Generate:

- scaffolds
- discussion prompts
- differentiation ideas
- feedback opportunities
- collaborative activities

Using the RASE Framework to Support Department Planning

Oide

Follow-Up Discussion

- Which outputs were useful?
- Which outputs needed teacher refinement?
- What did the AI miss?
- How did your professional judgement improve the final result?
- What could only have come from your knowledge of your students?

Using Digital Tools to Support Assessment for Learning

Oide

Click to play

As you watch: Consider the opportunities for the integration of digital tools in your practice.

Practice: Teacher Planning and Preparation

Supporting Learning Design

Assisting with curriculum and lesson planning:

The English department is reviewing their literacy and numeracy actions. To support this process, they use GenAI to **brainstorm** ideas on how to embed these skills into their schemes of work. As a department they **discuss** the usefulness of these ideas and agree actions and next steps.

Teacher
Planning and
Preparation

Practice: Teaching and Learning

Formative Assessment Practices

Example: In a brainstorming session, **students generate** individual ideas on a topic. The teacher can use GenAI to **organise** these inputs into categories and generates a visual mind map. The teacher then uses the mind map for questioning, group discussion, and connecting new material to existing knowledge. **Teacher cites use** of Gen AI.

Teaching
and
Learning

Planning to use Digital Tools: Identify, Explore, Connect, Share.

Oide

Step 1 – Identify

Return to your Unit of Learning.

- Identify one place technology might support:
 - Reading?
 - Writing?
 - Oracy?
 - Inclusion?

Step 2 – Explore

Individually, using the Padlet:

- Select one digital tool that interests you.
- Watch the short demonstration video.
- Consider:
 - What does the tool do?
 - How might it support learning in English?
 - What are its limitations?

Step 3 – Connect

Discuss with your partner or table:

How could this tool support:

- Reading?
- Writing?
- Oracy?
- Inclusion?

Step 4 – Share

Prepare a 30-second debrief.
