What is the structure of SCL1LP?

Curriculum area	Number of Modules
Numeracy	4
Communication and Literacy	3
Personal Care	3
Electives	5

SCL1 Elective modules to choose from:

Physical Education	Music
Visual Art	Cookery
Drama	Special Interest
Being part of the community	Looking after my environment

What is the structure of SCL2LP?

Curriculum area	Number of Modules
Numeracy	4
Communication and Literacy	3
Personal Care	3
Electives	5

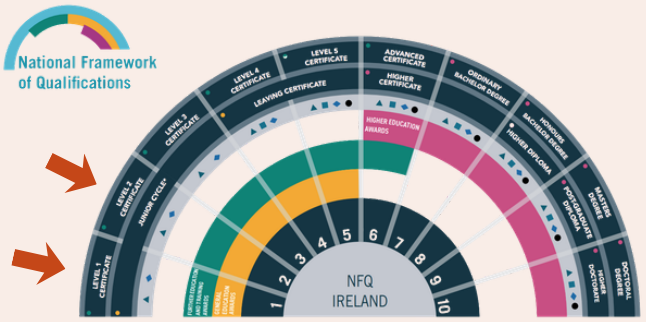

SCL2 Elective modules to choose from:

Physical Education	Music
IT skills	Literature
My life, my finance	The past in my place
Visual Art	Cookery
Drama	Special Interest
Design and do	Looking after my environment
Preparation for life after school	

Assessment & Certification Portfolio

The evidence of learning for the Level 1 and Level 2 Learning programmes at senior cycle will be gathered in a portfolio, which will be presented for assessment for certification.

To support the teacher in identifying if, and to what extent, a student is making progress across the modules and learning outcomes, the progression continuum is provided in the programme statement.

The learning recognised for certification will be at Level 1 and/or Level 2 of the National Framework of Qualifications (NFQ). Each module completed by the student will be certificated by the State Examinations Commission (SEC). Awaiting assessment guideline publication.

Senior Cycle Level 1 & Level 2 Learning Programmes

Information Leaflet

What are the Senior Cycle Level 1 Learning Programmes and Level 2 Learning Programmes?

The Level 1 and Level 2 Senior cycle programmes(SCL1L2) are a follow on programme from Junior Cycle Level 1 and Level 2 programmes. The SCL1L2 programmes are a two year personalised programme that are tailored to the individual learning needs of the student, which is necessary to achieve the best possible outcomes for the student.

The SCL1LP and SCL2LP consist of a range of curriculum areas, each designed on a modular basis. A specification is provided separately for each curriculum area and its associated modules.

The Senior Cycle Learning Programmes: Level 1 and Level 2 Programme Statement and the Guidelines to support the assessment of the Senior Cycle Level 1 and Level 2 Learning Programmes can be found on www.curriculumonline.ie

Who are they designed for?

Senior Cycle Level 1 Learning Programme (SCL1LP) is designed for students who are likely to have significantly delayed development across a number of areas including learning, communication, language and adaptive skills.
This group of students often have complex, multiple cognitive and functioning needs. They may have difficulty understanding the world around them and their place in it.

Senior Cycle Level 2 Learning Programme (SCL2LP) is designed for students whose cognitive profiles prevent them from accessing the Leaving Certificate Established (LCE) programme, the Life, Community and Work (LCW) programme or the Leaving Certificate Applied (LCA) programme. They are likely to have delayed development across a number of areas, including learning, communication, language and adaptive skills.

Where will the programmes take place?

The SCL1LP and SCL2LP have been designed with sensitivity to the variety of contexts in which a student may be attending for their education, whether in a post-primary mainstream school, a special class in a mainstream school or in a special school.

Organising the Learning Programmes

As the learning programmes are personalised, organising the programme should revolve around the individual student. Using the student's Student Support File, the student's strengths and specific needs should be identified in consultation with parents/guardians, teachers and the student themselves, where possible.

Continuity, progression and pathways

Progression and pathways will, and should, be unique to each student pursuing the Level 1 or Level 2 programmes at senior cycle. Continuity between the Level 1 and Level 2 programmes at senior cycle and the junior cycle L1LPs and L2LPs has been fostered through the design of the curriculum areas and modules.
