Photographic Analysis: Observe, analyse and interpret approach

Observe	Analyse	Interpret
Describe exactly what you see.	What is happening in it?	What impact would this photograph have had on viewers at the time?
What people/objects are shown?	Is it a staged/unstaged shot?	Has its impact changed over time?
What is the setting?	What does the photographer want us to see?	What can we learn from it?
What else can you see?	Was it intended as a public or private record?	What can we not learn from it?
here other relevant information available such as labels/captions? What do they tell us?	Is it simply presenting facts, and/or is it a 'message' shot?	What can we infer from it?
