Planning Resources

Resources to support planning, available on Scoilnet.ie and by clicking on the links below:

Resource	A Sample Unit of learning
Notes	This sample unit of learning was created by ETSS Wicklow on the concepts of relationships and variables. Areas that could be included in planning for Units of Learning: - the title/theme - -the Learning Outcomes from **across the strands** of the specification - the key learning - the student learning experiences (methodologies that are used, resources used, the learning activities and tasks). These student learning experiences should seek to develop students' key skills/competencies - modes of assessment - reflection e.g. What worked well? What can be improved? How can it be improved? Teachers can further distil the Units of Learning and add/amend the content to include differentiation strategies, DEIS/SSE targets, literacy and numeracy targets and specific teaching and learning methodologies that are required for their student cohort. The overall curriculum plan/scheme of work for the subject outlines the timeframe when the various units of learning will be delivered in the classroom and may indicate when assessments occur.

Resource	Planning for Teaching Learning and Assessment in First Year
Notes	This resource is a self-guided CPD Planning booklet for teaching, learning and assessment. The core parts of this document are: - Exploring and planning with concepts and ideas in Mathematics at Junior Cycle - Mathematics Planning - Next Steps for Our Department
