Reflection on

How can schools best plan for assessment, learning and teaching?

eflect upon the key messages that resonate with you from this v	ideo
ip:	

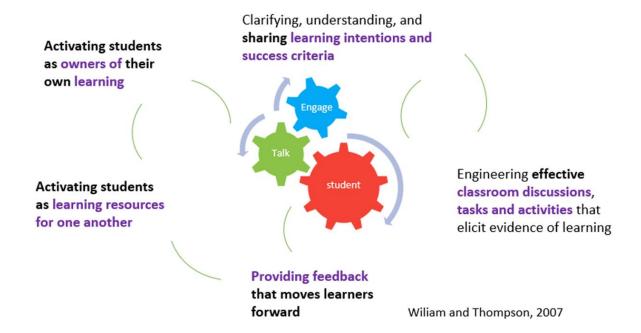

Reflection on Session One

What... has been your key learning in session one? What concepts have been explored? So what... does this mean to me? How does this connect with previous ideas? Now what... will this mean for my classroom practice?

Pillars of Formative Assessment

Reflection on Formative Assessment

Reflect on how formative assessment supports your classroom practice.

Consider the role of formative assessment in supporting student learning.

Student Learning Journey

Most relevant aspects of learning outcomes for age and stage of students

Units of Learning supporting incremental development across strands and elements

Ongoing assessment and feedback which supports students' learning

Year 1

CBA 2: Food Literacy Skills Brief (3 weeks) SEC Practical Food Skills Examination SEC Written Examination

Feedback

'Assessment in Junior Cycle Home Economics will optimise the opportunity for students to become reflective and active participants in their learning and for teachers to support this. This rests upon the provision for learners of opportunities to negotiate success criteria against which the quality of their work can be judged by peer, self, and teacher assessment; and upon the quality of the focused feedback, they get in support of their learning.'

(NCCA, Junior Cycle Home Economics Specification, 2017, p. 18)

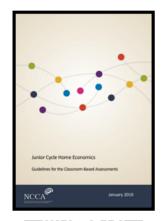

Peer Discussion - Peer Feedback

'Students will use peer discussion to reflect on their own work and provide feedback to their peers.'

(NCCA, Junior Cycle Home Economics Assessment Guidelines, 2019, p. 17)

Peer Feedback Mentimeter

Go to www.menti.com & use the code on screen.

What are the different ways that peer feedback happens in your classroom?

Exploring Methods of Peer Feedback

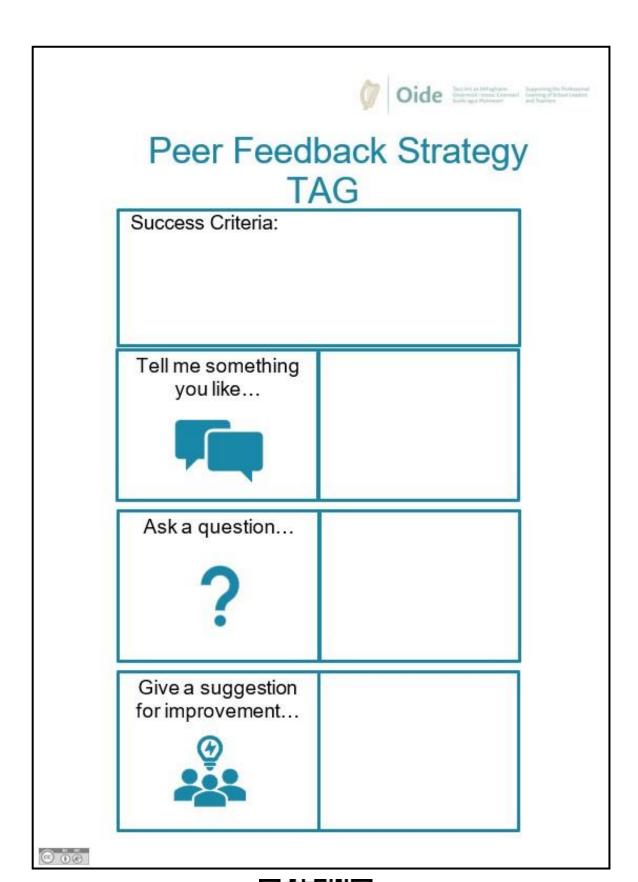

Exploring Peer Feedback Strategies

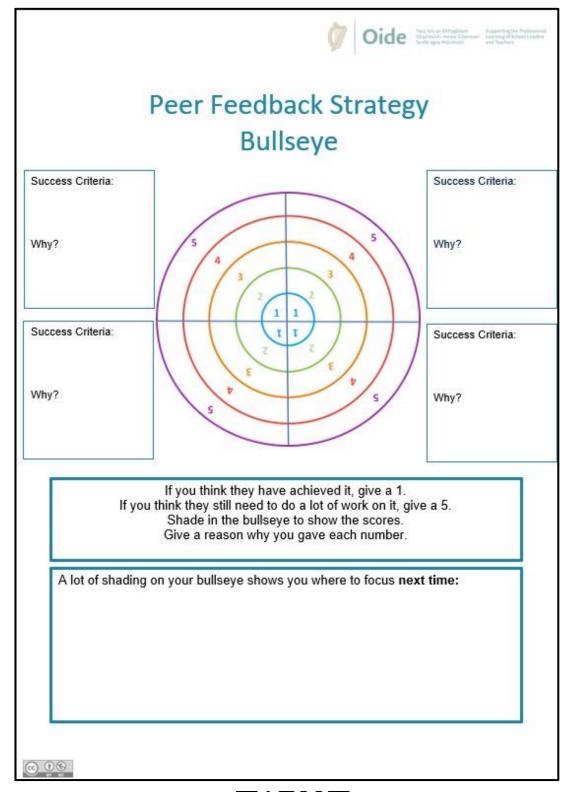

14

Reflection on Facilitating Peer Feedback in Your Classroom

What changes might need to occur in my classroom to support students when giving feedback to, and receiving feedback from, their peers?

Reflection on Co-Creating Success Criteria to Support Peer Feedback

Reflect upon the key messages that resonate with you from this video clip:

Peer Feedback - Padlet Wall **Breakout Room Instructions**

the Padlet Wall

Discuss

the prompts on the Padlet Wall and record your answers

Time

20 minutes

Reflection on Peer Feedback **Padlet Wall**

Consider the role of success criteria in supporting peer feedback.

Getting started with Peer Feedback based on Success Criteria.

Next Steps with Peer Feedback based on Success Criteria.

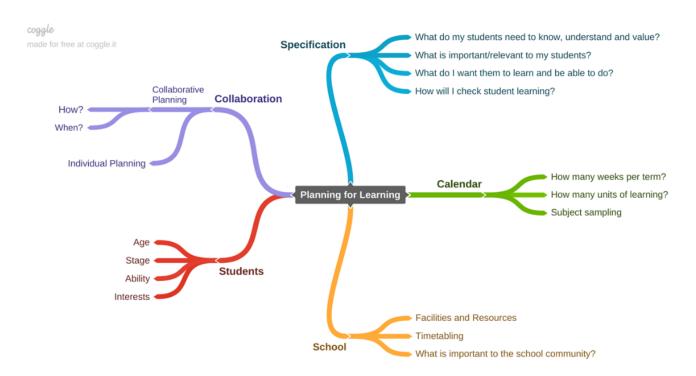

Moving Forward with Peer Feedback based on Success Criteria.

Reflection on Session Two

What... has been your key learning in session two? What concepts have been explored? So what... does this mean to me? How does this connect with previous ideas? Now what... will this mean for my classroom practice?

Considerations when Planning for Learning

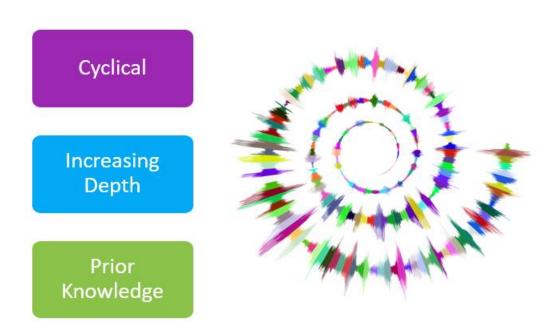

Learning Outcomes

'The specification stresses that the learning outcomes are for three years and therefore the learning outcomes focused on at a point in time will not have been 'completed' but will continue to support the students' learning in home economics up to the end of junior cycle.'

(NCCA, Junior Cycle Home Economics Specification, 2017, p. 14)

Reflection on Session Three

What... has been your key learning in session three? What concepts have been explored? So what... does this mean to me? How does this connect with previous ideas? Now what... will this mean for my classroom practice?

Junior Cycle Home Economics Overview

Aim: Home Economics aims to develop students' knowledge, attitudes, understanding, skills and values to achieve optimal, healthy and sustainable living for every person as an individual, and as a member of families and society. Students develop practical food and health literacy skills so that they are enabled to adopt a healthy lifestyle and make informed decisions that positively impact their health and wellbeing as individuals as well as within their families and society. Home Economics nurtures students' resourcefulness, innovation, adaptability, and competency as consumers. It develops students' creative design and textile skills. Home Economics develops students who are environmentally conscious and dedicated to a sustainable and responsible way of life.

Strand 1 Food, health and culinary skills

This strand focuses on developing students' food, health and culinary skills. Students are enabled to develop a healthy, sustainable attitude and positive relationship practical food through experiential learning. They apply their understanding of nutrition, diet and health principles in order to adopt a healthy lifestyle and make informed decisions that impact the health and wellbeing of themselves as individuals as well as within their families. application of practical food and health literacy skills is integral to this strand and includes menu planning; shopping; cooking; health and safety food skills; portion control; reading food labels; dietary analysis; costing; sensory analysis; and food waste.

Strand 2 Responsible family living

This strand enables students to explore, from a systems perspective, responsible family Students living. develop understanding of the different forms and role of families as the core social unit. They develop an understanding of the role of the family in the development of the child in a safe and nurturing environment. Students develop lifeskills to enable them to manage responsibly resources sustainably in the home, family and community. They are facilitated to become discerning, competent consumers who are able to apply effective decision-making skills in everyday contexts in the home and community. Enabling students to become responsible and have a caring attitude towards other individuals, family members, society and the environment is integral to this strand.

Strand 3 Textiles and craft

This strand focuses on developing students' textile skills, knowledge and creativity. Practical textile and craft skills are integral to this strand and include hand and machine sewing skills, and fabric texturing and embellishment techniques. Students are enabled to make sustainable decisions as consumers in the choice and maintenance of clothing and textiles. Students will apply the design brief process in designing and making a textile item for an individual or the home.

Element: Individual and family empowerment Across the strands, the learning outcomes in this element focus on a systems approach to individual and family empowerment. Students develop practical lifeskills that can be adapted to address practical, real world, perennial problems or concerns in everyday contexts in the home, family and society. They are facilitated to develop as critical, creative thinkers and problem-solvers able to make informed decisions to achieve optimal, healthy and sustainable living for individuals, households, families and society.

Element: Health and wellbeing This element focuses on developing students' knowledge, skills and understanding to make informed decisions that positively impact on their health and wellbeing of themselves as individuals as well as within their families. Across each of the three strands students are facilitated, using a systems approach, to address new and emergent practical concerns that can impact on the wellbeing of individuals, families and society.

Element: Sustainable and responsible living Across the strands, the learning outcomes in this element facilitate students to develop as future oriented thinkers and environmentally-conscious citizens, committed to a sustainable and responsible way of life. Developing students' self-efficacy, critical reflection and discernment in the choice and use of resources in the home; in technological change; in environmental issues and the impact of these on resource management in the home and in personal consumption for everyday living underpin the learning outcomes in this element across each of the three strands.

Element: Consumer competence This element focuses on developing students who have the knowledge, skills and understanding to make informed and discerning consumer choices that affect individuals, families and households in contemporary society. Students develop the essential lifeskills to become active, adaptable, consumer-literate citizens able to apply effective decision-making skills in everyday contexts.

Junior Cycle Home Economics Learning Outcomes

Strand 1: Food, health

Strand 2: Responsible family living

Strand 3: Textiles and

Element Individual and family empowerment

1.1 identify the factors that affect personal food choices

1.2 plan, prepare, cost and evaluate healthy and nutritious individual and family meals and snacks

- 1.3 apply a range of cooking principles and techniques in the preparation of healthy individual and family meals incorporating budgetary considerations
- 1.4 demonstrate culinary and creative skills in relation to the preparation, cooking and presentation of food
- 1.5 apply safe and hygienic practices in food handling, preparation, storage and serving1.6 using a problem-based learning approach, apply nutritional knowledge in the planning and
- preparation of food for the family

 1.7 use available technology for food planning
 and preparation

2.1 discuss the different forms of the family
2.2 explore the roles and responsibilities of
the family

- 2.3 discuss family relationships and the importance of strengthening relationships between individuals and families
- **3.1** demonstrate basic hand and machine sewing techniques
- 3.2 apply the design brief process and principles to the making of a creative textile item for an individual or the home 3.3 apply basic hand sewing and/or machine sewing techniques to the making
- of a textile item for an individual or the home in a safe and appropriate way 3.4 demonstrate fabric embellishment techniques

Health and wellbeing

1.8 discuss the elements of a healthy lifestyle **1.9** recognise the importance of nutrition

- and diet in contributing to health and wellbeing **1.10** explain the role of the nutrients in
- 1.10 explain the role of the nutrients in contributing to a healthy balanced diet
- **1.11** describe the basic structure and basic functions of the digestive system
- **1.12** investigate the nutritional requirements at each stage of the lifecycle
- 1.13 plan and prepare meals for individuals with diet-related diseases
- **1.14** apply the nutritional requirements of individuals with special dietary considerations when planning and preparing meals
- 2.4 discuss the requirements of a safe and nurturing home environment
- 2.5 assess the importance of making informed and responsible decisions in everyday life 2.6 apply the design principles and guidelines to room planning and the design of an interior space in the home

3.5 appreciate the therapeutic and leisure role of participating in textile work

Element Sustainable and esponsible living

1.15 investigate the impact of their food choices from an ecological and ethical perspective

1.16 apply sustainable practices to the selection and management of food and material resources

- identify how individuals, families and households can contribute to sustainable and responsible living
- 2.8 describe sustainable everyday practices in the home to include energy efficiency, waste management and water conservation
- **2.9** explore the influence of technology on the management of personal, family and household resources
- 3.6 demonstrate ways in which clothing and/or textile household items can be repaired, reused, re-purposed, recycled and upcycled
- **3.7** evaluate textile care procedures used in the home from an environmental perspective
- 3.8 discuss the influences of trends and choices on textile and clothing, including ethical and ecological considerations

Consumer competence

Element

- 1.17 compare common foods used in food preparation and how they affect the nutrition and sensory quality of the product 1.18 evaluate commercial and homemade food products
- 1.19 interpret the information found on a variety of food products using front-of-pack and back-of-pack food labels
- **2.10** apply consumer decision-making skills in the management of personal, family and household resources for everyday living
- **2.11** debate consumers' rights and responsibilities
- **2.12** examine how consumers are protected in Ireland by legislation, statutory and non-statutory agencies
- 2.13 apply financial literacy skills in the preparation and evaluation of a budget for independent living

3.9 apply their knowledge of textile care symbols

Junior Cycle Home Economics Action VERBS

study or examine something in detail, break down in order to bring out the essential elements or structure; identify parts and relationships, and to interpret information to reach conclusions

Apply

select and use information and/or knowledge and understanding to explain a given situation or real circumstances

Appreciate

recognise the meaning of, have a practical understanding

Assess

judge, evaluate or estimate the nature, ability, or quality of something

group things based on common characteristics

Compare

give an account of the similarities and (or) differences between two (or more) items or situations, referring to both (all) of them throughout

Complete

finish making or doing; bring to a successful conclusion

Conduct

organise and carry out

Consider

describe patterns in data; use knowledge and understanding to interpret patterns, make predictions and check reliability

Construct

develop information in a diagrammatic or logical form; not by factual recall but by analogy or by using and putting together information

Convert

change to another form

to make or bring into existence something new

Debate

argue about a subject, especially in a formal manner

Demonstrate

prove or make clear by reasoning or evidence, illustrating with examples or practical application

Describe

develop a detailed picture or image of, for example a structure or a process, using words or diagrams where appropriate; produce a plan, simulation or model

Determine

ascertain or establish exactly by research or calculation

progress or improve to become more mature, advanced, or elaborate

plan, create or formulate a procedure or system by careful thought

Differentiate

recognise or ascertain what makes something different

Discuss

offer a considered, balanced review that includes a range of arguments, factors or hypotheses; opinions or conclusions should be presented clearly and supported by appropriate evidence

Distinguish

make the differences between two or more concepts or items clear

Junior Cycle Home Economics Action VERBS

Evaluate (data)

collect and examine data to make judgments and appraisals; describe how evidence supports or does not support a conclusion in an inquiry or investigation; identify the limitations of data in conclusions; make judgments about ideas, solutions or methods

Evaluate (ethical judgement)

collect and examine evidence to make judgments and appraisals; describe how evidence supports or does not support a judgement; identify the limitations of evidence in conclusions; make judgments about ideas, solutions or methods

Examine

consider an argument or concept in a way that uncovers the assumptions and relationships of the issue

Explain

give a detailed account including reasons or causes

Explore

systematically look into something closely; to scrutinise or probe

Identify

recognise patterns, facts, or details; provide an answer from a number of possibilities; recognise and state briefly a distinguishing fact or feature

Interpret

use knowledge and understanding to recognise trends and draw conclusions from given information

Investigate

observe, study, or make a detailed and systematic examination, in order to establish facts and reach new conclusions

Justify

give valid reasons or evidence to support an answer or conclusion

Prepare

make something ready for use or presentation

Present

promote or propose an idea; deliver or illustrate evidence; show something for others to examine

Propose

put forward a plan or suggestion for consideration

Recognise

identify facts, characteristics or concepts that are critical (relevant/appropriate) to the understanding of a situation, event, process or phenomenon

Recommend

put forward something with approval as being suitable for a particular purpose

Relate

associate, giving reasons

State

provide a concise statement with little or no supporting argument

Suggest

propose a solution, hypothesis or other possible answer

Understand

have and apply a well-organised body of knowledge

Use

apply knowledge or rules to put theory into practice

Verify

give evidence to support the truth of a statement

Glossary of Home Economics Terms

This glossary is designed to clarify the terminology as used in the Junior Cycle Home Economics Specification to enable teachers and students to understand how the terms are interpreted and applied.

Term	Interpretation
Design brief process (DBP)	An open brief is used to outline the requirements of a particular task. The DBP is ideally cyclical and reflective and may involve the following stages: defining the problem/task; investigation/research; generating ideas; developing possible solutions; presenting ideas to others for feedback; refining the design; production of product; evaluation.
Food literacy	Food literacy involves the inter-related knowledge, skills, attitudes, and behaviours which are required to plan, prepare and cook food.
Practical perennial problems	Practical perennial problems are concerns endured from generation to generation by families, both locally and globally, which require thoughtful action and reflective, critical decision-making skills to resolve.
Systems approach	A systems approach looks at the interrelatedness of contexts and no one situation in isolation. It considers multiple contexts affecting the complexities of life and family life in the twenty-first century.
Food skills	Food skills refers to the broad range of knowledge and skills applied during the planning, preparation, implementation, and evaluation of a meal/dish/product.
Diet-related diseases	Diet-related diseases (or nutrition-related chronic diseases) are diseases that may result from dietary intake that deviates from population dietary recommendations. These include chronic diseases such as obesity, diabetes, cardiovascular disease, osteoporosis, and

	dental disease.
Special dietary consideration	Although there is no legal definition, people with 'special dietary considerations' would include those who are advised to, or choose to deviate from population dietary recommendations. This could be for both medical (e.g. coeliac disease, food allergies, food intolerance, inflammatory bowel disease) and non-medical reasons (e.g. vegetarian diets, religious or cultural reasons).

(NCCA, Junior Cycle Home Economics Specification, 2017, p.26)

Glossary of Junior Cycle Terms

Classroom-	Classroom-Based Assessments are best described as the occasions when
Based	the teacher assesses the students using the specific tasks set out in the
Assessments	subject specification. The tasks are clearly described, as are the criteria for
(CBA)	assessment to support teacher judgement. The criteria are found in the
	features of quality linked to each Classroom-Based Assessment. Although
	the assessment is similar to the formative assessment that occurs every day
	in class, in the case of Classroom-Based Assessment the teacher's
	judgement is recorded for Subject Learning and Assessment Review and is
	used in the school's reporting to parents and students.
Features of	The features of quality support student and teacher judgement of the
Quality	Classroom-Based Assessments and are the criteria that will be used by
	teachers to assess the pieces of student work.

Formative Assessment (Framework p. 35-36) **Junior Cycle** Profile of Achievement

The Junior Cycle will be underpinned by the further integration of formative assessment as a normal part of teaching and learning in classrooms. Formative assessment involves teachers and students reflecting on how learning is progressing and deciding next steps to ensure successful outcomes. A vital part of formative assessment is the feedback that teachers provide to their students. Through a range of assessment activities the teacher helps the student to identify what has been achieved and where there is room for further learning and development. To facilitate the type of learning envisaged above, the role of the teacher and the dynamics of the teacherstudent relationship will evolve. Teachers will place a greater emphasis on integrating assessment into their teaching so they can better monitor students' progress in learning and identify how they can support students to reflect on and critically analyse their own learning.

(JCPA) (Framework p.

46)

The JCPA will reward achievement across all areas of learning as applicable: Subjects, Short Courses, Wellbeing, Priority Learning Units, other areas of learning. The JCPA will draw upon and report on achievement across all elements of assessment including ongoing, formative assessment; Classroom-Based Assessments; and SEC grades which include results from the state-certified examinations and the Assessment Tasks. The JCPA will have a nationally determined format. It will be compiled by the school and received by students in the autumn following third year, when all assessment results from the SEC and the school are available and confirmed.

Subject Learning and Assessment Review (SLAR) Meetings (Framework p.

In Subject Learning and Assessment Review meetings, teachers will share and discuss samples of their assessments of student work and build a common understanding about the quality of student learning. Each Subject Learning and Assessment Review meeting will be subject-specific and will focus on the Classroom-Based Assessment undertaken by the particular year group.

Criteria (NCCA Glossary

39-40)

Success

Success criteria are linked to learning intentions. They are developed by the teacher and/or the student and describe what success looks like. They help the teacher and student to make judgements about the quality of student learning.

of Terms)

Summative	Assessment is summative when it is used to evaluate student learning at the
Assessment	end of the instructional process or of a period of learning. The purpose is to
	summarise the students' achievements and to determine whether and to what
(NCCA Glossary	degree the students have demonstrated understanding of that learning by
of Terms)	comparing it against agreed success criteria or features of quality.
Learning	Learning Intention: A learning intention for a lesson or series of lessons is a
Intentions and	statement, created by the teacher, which describes clearly what the teacher
Learning	wants the students to know, understand and be able to do as a result of the
Outcomes	learning and teaching activities.
(NCCA Glossary	Learning Outcomes: Learning outcomes are statements in curriculum
of Terms)	specifications to describe the understanding, skills and values students
	should be able to demonstrate after a period of learning.
Unit of	A unit of learning links learning outcomes which clearly set out what the
Learning	students should know, understand, and be able to do as a result of the learning
	and teaching activities within that unit.

Further information and resources can be found on the JCT website: www.jct.ie
