Food Literacy Skills Examination (50% of Total Marks)

Assignment Briefs

**Directions to Candidates**

1. Each candidate will complete a practical performance test in the presence of an external examiner appointed by the State Examinations Commission. Duration: 1 hour 30 minutes.
2. The practical performance test must comply with one of the assignment briefs listed on page 2.
3. Each candidate will draw one assignment brief from the list.
4. The maximum number of candidates in an examination session is 12. The full range of assignment briefs should be used in each session.
5. Each candidate must present evidence of preparatory planning and carry out a written evaluation during the examination.
6. Candidates are not permitted to use mobile phones or electronic devices during the examination.
7. Teachers should draw the attention of candidates to the information on page 3.

# Pillars of Formative Assessment

# Reflection on Formative Assessment

Oide

Reflect on how formative assessment supports your classroom practice.

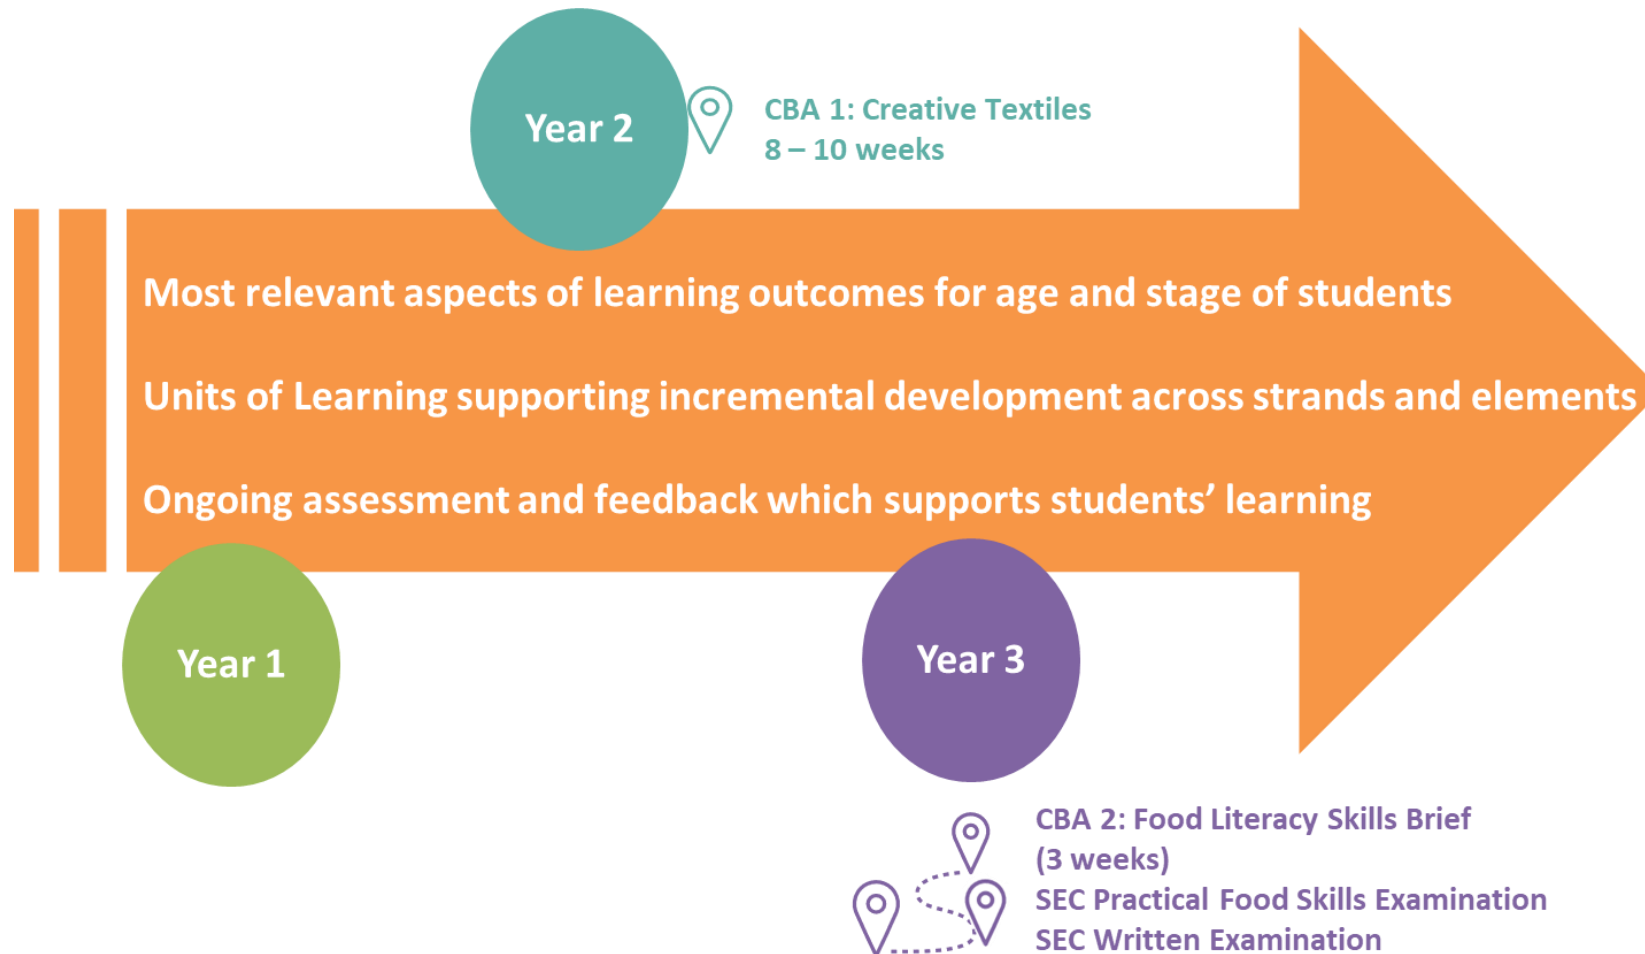

Consider the role of formative assessment in supporting student learning.

# Student Learning Journey

Oide

# Feedback

*‘Assessment in Junior Cycle Home Economics will optimise the opportunity for students to become reflective and active participants in their learning and for teachers to support this. This rests upon the provision for learners of opportunities to negotiate success criteria against which the quality of their work can be judged by peer, self, and teacher assessment; and upon the quality of the focused feedback, they get in support of their learning.’*

(NCCA, Junior Cycle Home Economics Specification, 2017, p. 18)

# Peer Discussion - Peer Feedback

Oide

*‘Students will use peer discussion to reflect on their own work and provide feedback to their peers.’*

(NCCA, Junior Cycle Home Economics Assessment Guidelines, 2019, p. 17)

# Exploring Methods of Peer Feedback

Oide

# Exploring Peer Feedback Strategies

**Peer Assessment Using Success Criteria**

“... success criteria summarise the **key steps** or **ingredients** the student needs in order to fulfil the learning intention - the main things to do, include or focus on.”<sup>15</sup>

Shirley Clarke 2010

- The teacher states ‘This project will be complete when...’
- Students write phrases that explain their idea of completeness for the project in question.
- Students pair up and compare their ideas.
- Pairs join with another pair and agree on a list.
- Collect the lists from each group of 4.
- Refine the lists to a manageable number that the class agree upon.
- Students record the final list of success criteria.
- At the end of the project the students work in pairs and apply the agreed success criteria to their peer’s project.
- Feedback can be given verbally or in writing depending on the success criteria.

**Tips**

- Have a class discussion to agree how peer feedback should be given.
- Success criteria are:
  - **linked** to learning intentions and activity specific.
  - **discussed and agreed** with students prior to undertaking the activity.
  - a focal point and provide a **scaffold** for students while engaged in the activity.
  - used as a basis for **feedback** and peer/self-assessment.

**Further Information**  
Further reading and support on implementing this strategy is available on [WWW.JCT.IE](http://WWW.JCT.IE)

**Key Skills**

- ▶ Managing information and thinking
- ▶ Managing myself
- ▶ Communicating
- ▶ Being literate

**Resources**

- ▶ Whiteboard
- ▶ Past projects/assignments etc can be used as exemplars

**Room Layout**

No specific room layout required, however organising students in groups of 4 would facilitate the activity.

**Assessment**

Peer assessment can be used to assess the project based on the success criteria. The success criteria can be used as framework for feedback from the teacher also.

**Supporting Homework**

Success criteria can be used as a check list for students to complete the project.

### Junior Cycle Home Economics Overview

**Aim:** Home Economics aims to develop students' knowledge, attitudes, understanding, skills and values to achieve optimal, healthy and sustainable living for every person as an individual, and as a member of families and society. Students develop practical food and health literacy skills so that they are enabled to adopt a healthy lifestyle and make informed decisions that positively impact their health and wellbeing as individuals as well as within their families and society. Home Economics nurtures students' resourcefulness, innovation, adaptability, and competency as consumers. It develops students' creative design and textile skills. Home Economics develops students who are environmentally conscious and dedicated to a sustainable and responsible way of life.

#### Strand 1 Food, health and culinary skills

This strand focuses on developing students' food, health and culinary skills. Students are enabled to develop a healthy, sustainable attitude and positive relationship with food through practical experiential learning. They apply their understanding of nutrition, diet and health principles in order to adopt a healthy lifestyle and make informed decisions that impact the health and wellbeing of themselves as individuals as well as within their families. The application of practical food and health literacy skills is integral to this strand and includes menu planning; shopping; cooking; health and safety food skills; portion control; reading food labels; dietary analysis; costing; sensory analysis; and food waste.

#### Strand 2 Responsible family living

This strand enables students to explore, from a systems perspective, responsible family living. Students develop an understanding of the different forms and role of families as the core social unit. They develop an understanding of the role of the family in the development of the child in a safe and nurturing environment. Students develop life skills to enable them to manage resources responsibly and sustainably in the home, family and community. They are facilitated to become discerning, competent consumers who are able to apply effective decision-making skills in everyday contexts in the home and community. Enabling students to become responsible and have a caring attitude towards other individuals, family members, society and the environment is integral to this strand.

#### Strand 3 Textiles and craft

This strand focuses on developing students' textile skills, knowledge and creativity. Practical textile and craft skills are integral to this strand and include hand and machine sewing skills, and fabric texturing and embellishment techniques. Students are enabled to make sustainable decisions as consumers in the choice and maintenance of clothing and textiles. Students will apply the design brief process in designing and making a textile item for an individual or the home.

**Element: Individual and family empowerment** Across the strands, the learning outcomes in this element focus on a systems approach to individual and family empowerment. Students develop practical life skills that can be adapted to address practical, real world, personal problems or concerns in everyday contexts in the home, family and society. They are facilitated to develop as critical, creative thinkers and problem-solvers able to make informed decisions to achieve optimal, healthy and sustainable living for individuals, households, families and society.

**Element: Health and wellbeing** This element focuses on developing students' knowledge, skills and understanding to make informed decisions that positively impact on their health and wellbeing of themselves as individuals as well as within their families. Across each of the three strands students are facilitated, using a systems approach, to address new and emergent practical concerns that can impact on the wellbeing of individuals, families and society.

**Element: Sustainable and responsible living** Across the strands, the learning outcomes in this element facilitate students to develop as future oriented thinkers and environmentally-conscious citizens, committed to a sustainable and responsible way of life. Developing students' self-efficacy, critical reflection and discernment in the choice and use of resources in the home, in technological change, in environmental issues and the impact of these on resource management in the home and in personal consumption for everyday living underpin the learning outcomes in this element across each of the three strands.

**Element: Consumer competence** This element focuses on developing students who have the knowledge, skills and understanding to make informed and discerning consumer choices that affect individuals, families and households in contemporary society. Students develop the essential life skills to become active, adaptable, consumer-literate citizens able to apply effective decision-making skills in everyday contexts.

### Junior Cycle Home Economics Learning Outcomes

	Strand 1: Food, health and culinary skills	Strand 2: Responsible family living	Strand 3: Textiles and craft
<b>Element: Individual and family empowerment</b>	<p>1.1 Identify the factors that affect personal food choices</p> <p>1.2 Make strategic, cost and nutrition healthy and nutritious individual and family meals and snacks</p> <p>1.3 Apply a range of cooking techniques and techniques in the preparation of healthy individual and family meals incorporating budgetary considerations</p> <p>1.4 Demonstrate culinary and creative skills in relation to the preparation, cooking and presentation of food</p> <p>1.5 Apply safe and hygienic practices in food handling, preparation, storage and serving</p> <p>1.6 Utilise a problem-based learning approach, apply nutritional knowledge in the planning and preparation of food for the home</p> <p>1.7 Use available technology for food planning and preparation</p>	<p>2.1 Discuss the different forms of the family</p> <p>2.2 Explain the role and responsibilities of the family</p> <p>2.3 Discuss family relationships and the importance of interpersonal relationships between individuals and families</p>	<p>3.1 Demonstrate basic hand and machine sewing techniques</p> <p>3.2 Apply the design brief process and principles to the making of a costume item or an individual or the home</p> <p>3.3 Apply hand and machine sewing techniques to the making of a textile item for an individual or the home in a safe and appropriate way</p> <p>3.4 Demonstrate basic embroidery techniques</p>
<b>Element: Health and wellbeing</b>	<p>1.8 Discuss the elements of a healthy lifestyle</p> <p>1.9 Recognise the importance of nutrition and diet in contributing to health and wellbeing</p> <p>1.10 Explain the role of the nutrients in contributing to a healthy balanced diet</p> <p>1.11 Describe the basic structure and basic functions of the digestive system</p> <p>1.12 Identify the nutritional requirements of each stage of the lifespan</p> <p>1.13 Plan and prepare meals for individuals with different needs</p> <p>1.14 Apply the nutritional requirements of individuals with special dietary considerations when planning and preparing meals</p>	<p>2.4 Discuss the requirements of a safe and nurturing home environment</p> <p>2.5 Assess the importance of making informed and responsible decisions to improve the home</p> <p>2.6 Apply the design process and guidelines to room planning and the design of an interior space in the home</p>	<p>3.5 Appreciate the therapeutic and leisure role of participating in textile work</p>
<b>Element: Sustainable and responsible living</b>	<p>1.15 Investigate the impact of their food choices from an ecological and ethical perspective</p> <p>1.16 Apply sustainable practices to the selection and management of food and natural resources</p>	<p>2.7 Identify how individuals, families and households can contribute to sustainable and responsible living</p> <p>2.8 Discuss sustainable energy practices in the home to include energy efficiency, waste management and water conservation</p> <p>2.9 Explain the influence of technology on the management of personal, family and household resources</p>	<p>3.6 Demonstrate ways in which clothing and/or textile household items can be repaired, reused, re-purposed, recycled and recycled</p> <p>3.7 Evaluate textile care procedures used in the home from an environmental perspective</p> <p>3.8 Explain the influence of trends and choices on textile and clothing, including ethical and ecological considerations</p>
<b>Element: Consumer competence</b>	<p>1.17 Compare common food used in food preparation and how this affects the nutrition and sensory quality of the product</p> <p>1.18 Evaluate commercial and homemade food products</p> <p>1.19 Compare the advantages found in a variety of food products using the product and best-of-each food tools</p>	<p>2.10 Explain consumer decision-making skills in the management of personal, family and household resources for everyday living</p> <p>2.11 Define consumer rights and responsibilities</p> <p>2.12 Examine how consumers are protected in Ireland's legislation, regulatory and non-regulatory agencies</p> <p>2.13 Apply financial literacy skills in the preparation of a Budget for the purchasing year</p>	<p>3.8 Assess their knowledge of textile care symbols</p>

### Junior Cycle Home Economics Action VERBS In Learning Outcomes

<b>Apply</b> select and use information and/or knowledge and understanding to explain a given situation or real circumstances	<b>Evaluate (ethical judgement)</b> collect and examine evidence to make judgments and appraisals; describe how evidence supports or does not support a judgment; identify the limitations of evidence in conclusions; make judgments about ideas, solutions or methods
<b>Appreciate</b> recognise the meaning of, have a practical understanding of	<b>Examine</b> consider an argument or concept in a way that uncovers the assumptions and relationships of the issue
<b>Assess</b> judge, evaluate or estimate the nature, ability, or quality of something	<b>Explain</b> give a detailed account including reasons or causes
<b>Compare</b> give an account of the similarities and (or) differences between two (or more) items or situations, referring to both (all) of them throughout	<b>Explore</b> systematically look into something closely to scrutinise or probe
<b>Debate</b> argue about a subject, especially in a formal manner	<b>Identify</b> recognise patterns, facts, or details; provide an answer from a number of possibilities; recognise and state briefly a distinguishing fact or feature
<b>Demonstrate</b> prove or make clear by reasoning or evidence, illustrating with examples or practical application	<b>Infer</b> use knowledge and understanding to recognise trends and draw conclusions from given information
<b>Describe</b> develop a detailed picture or image of, for example a structure or a process, using words or diagrams where appropriate; produce a plan, simulation or model	<b>Investigate</b> observe, study, or make a detailed and systematic examination, in order to establish facts and reach new conclusions
<b>Discuss</b> offer a considered, balanced review that includes a range of arguments, factors or hypotheses; opinions or conclusions should be presented clearly and supported by appropriate evidence	<b>Prepare</b> make something ready for use or presentation
<b>Evaluate (data)</b> collect and examine data to make judgments and appraisals; describe how evidence supports or does not support a conclusion in an inquiry or investigation; identify the limitations of data in conclusions; make judgments about ideas, solutions or methods	<b>Recognise</b> identify facts, characteristics or concepts that are critical (relevant/ appropriate) to the understanding of a situation, event, process or phenomenon
	<b>Use</b> apply knowledge or rules to put theory into practice
