

Creating Backing Tracks from the Original Recording in Moises

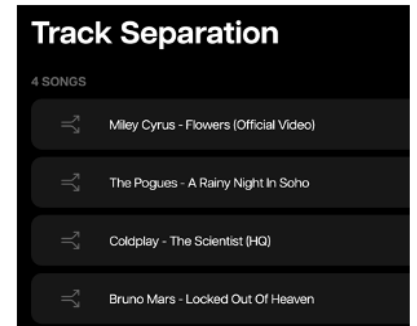

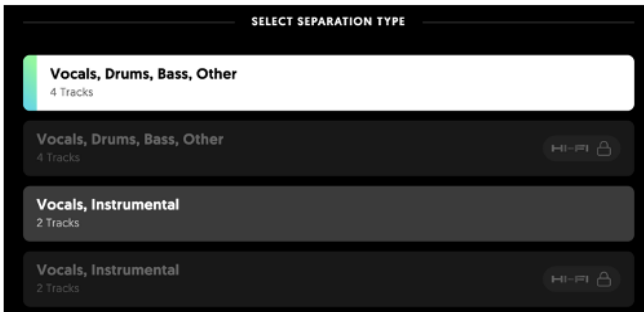

Step 1 – Open Moises.ai and upload an original recording

- Sign in to Moises.ai and click **New** to start a new track
- Drag and drop the audio file of the original recording into the box or click in the box to browse for a file

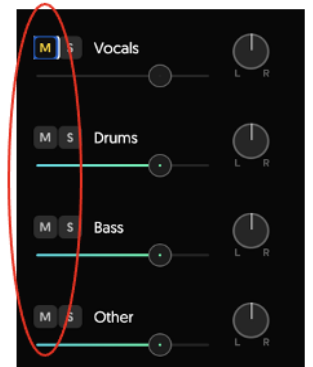

Step 2 – Separate tracks

- Click **Next** and **Select Separation Type** as required and then click **Submit**
- Click on the name of the track to open it

Step 3 – Create a mix and adjust key and/or tempo

- Click on the **M** to mute any tracks that you do not want in the backing track e.g., the vocals
- Adjust the tempo and key if required

Step 4 – Export the final mix

- Click **Export** then select file type and click **Export Mix**
