

Primary Mathematics Curriculum Muinín Online Workshop Series

Oide

In November and December, the OIDE Primary STEM team is delighted to invite teachers to engage online in a 5-part series of one-hour workshops. Muinín will provide a collaborative space to connect, share ideas and enhance learning, teaching and assessment.

This series of elective online workshops for teachers will explore Sets and Operations, Money, Transformations, Data, and Algebra.

Participating teachers will be grouped for these workshops depending on the stages they teach. This workshop series will be facilitated by Oide Professional Learning Leaders.
