Senior Cycle

Senior cycle Senior cycle aims to educate the whole person and contribute to human flourishing. Students' experiences throughout senior cycle enrich their intellectual, social and personal development and their overall health and wellbeing. Senior cycle has 8 guiding principles.

Senior Cycle Guiding Principles
Wellbeing and relationships
Inclusive education and diversity
Challenge, engagement and creativity
Learning to learn, learning for life
Choice and flexibility
Continuity and transitions
Participation and citizenship
Learning environments and partnerships

These principles are a touchstone for schools and other educational settings, as they design their senior cycle. Senior cycle consists of an optional Transition Year, followed by a two-year course of subjects and modules. Building on junior cycle, learning happens in schools, communities, educational settings, and other sites, where students' increasing independence is recognised. Relationships with teachers are established on a more mature footing and students take more responsibility for their learning.

Senior cycle provides a curriculum which challenges students to aim for the highest level of educational achievement, commensurate with their individual aptitudes and abilities. During senior cycle, students have opportunities to grapple with social, environmental, economic, and technological challenges and to deepen their understanding of human rights, social justice, equity, diversity and sustainability. Students are supported to make informed choices as they choose different pathways through senior cycle and every student has opportunities to experience the joy and satisfaction of reaching significant milestones in their education. Senior cycle should establish firm foundations for students to transition to further, adult and higher education, apprenticeships, traineeships and employment, and participate meaningfully in society, the economy and adult life.

The educational experience in senior cycle should be inclusive of every student, respond to their learning strengths and needs, and celebrate, value, and respect diversity. Students vary in their family and cultural backgrounds, languages, age, ethnic status, beliefs, gender, and sexual identity as well as their strengths, needs, interests, aptitudes and prior knowledge, skills, values and dispositions. Every student's identity should be celebrated, respected, and responded to throughout their time in senior cycle.

At a practical level, senior cycle is supported by enhanced professional development; the involvement of teachers, students, parents, school leaders and other stakeholders; resources; research; clear communication; policy coherence; and a shared vision of what senior cycle seeks to achieve for our young people as they prepare to embark on their adult lives. It is brought to life in schools and other educational settings through:

- effective curriculum planning, development, organisation, reflection and evaluation
- teaching and learning approaches that motivate students and enable them to improve
- a school culture that respects students and promotes a love of learning.

Programme Statement: Overview

The Senior Cycle Level 1 Learning Programme and the Senior Cycle Level 2 Learning Programme have been developed by the National Council for Curriculum and Assessment (NCCA) as follow on programmes for students who are progressing from Level 1 Learning Programmes (L1LPs) and Level 2 Learning Programmes (L2LPs) at junior cycle. The goal of the senior cycle programmes is to prepare students for life beyond school, enabling them to be lifelong learners and to live more independently. The Level 1 and Level 2 programmes at senior cycle are personalised programmes that are tailored to the individual learning needs of the student, which is necessary to achieve the best possible outcomes for the student.

The Programme Statement aims to support teachers, educators and school management in planning and designing senior cycle programmes at Level 1 and Level 2 which are responsive to each student's profile of strengths, needs and abilities. The Programme Statement:

- provides an overview of the Senior Cycle Level 1 and Level 2 Learning Programmes

- outlines the knowledge, skills, values and dispositions that students will develop in senior cycle

- supports the process of identifying the student whose learning profile would be best suited to accessing the Senior Cycle Level 1 and/or Level 2 Programmes

- outlines the assessment and reporting arrangements for each programme.

Who the Learning Programmes are designed for

Level 1

The Senior Cycle Level 1 Learning Programme (SCL1LP) is designed for students, who are likely to have significant delayed development across a number of areas including learning, communication, language and adaptive skills.

This group of students often have complex, multiple cognitive and functioning needs. They may have difficulty understanding the world around them and their place in it. They may also find expressive and receptive communication challenging. Students may display significant motor needs, sensory needs or complex health care needs. Some students may display one or more of these difficulties as these needs may be inter-related.

Students with this level of need may be in special schools, or special classes in mainstream post-primary schools. Students following a SCL1LP will likely have engaged with L1LPs at junior cycle.

Schools must consult with the parents/guardians and the students themselves to discuss if the SCL1LP is appropriate for them. Parents/guardians must be made aware of the academic, curricular and further education implications where the student decides to follow the SCL1LP.

Level 2

The Senior Cycle Level 2 Learning Programme (SCL2LP) is designed for students whose cognitive profiles prevent them from accessing the Leaving Certificate Established (LCE) programme, Leaving Certificate Vocational Programme (LCVP) or the Leaving Certificate Applied Programme (LCA). They are likely to have delayed development across a number of areas, including learning, communication, language and adaptive skills.

Students following the SCL2LP will likely have engaged with the Level 2 Learning Programme at junior cycle. If attending a mainstream school, the student will be identified as being on the Support for Few level of the Continuum of Support (CoS).

Schools must consult with the parents/guardians and the students themselves to discuss if the SCL2LP is appropriate for them. Parents/guardians must be made aware of the academic, curricular and further education implications where the student decides to follow the SCL2LP.

The student's learning profile included in their Student Support File (SSF) will provide the collated evidence and information to indicate if they are best suited to pursue the SCL2LP.

Student Support File

The Student Support File (SSF) is used to collate all relevant information relating to the student. It is structured to provide a complete, comprehensive and holistic picture of the student, documenting their progress, strengths, needs and interventions. It helps to ensure continuity of support for a student and will enable parental engagement in the student's learning. The SSF identifies:

- specific special educational needs (SEN)
- the student's learning profile
- the teaching and/or assistive technology resources required to support the student
- strategies and interventions to support the student.

Gathering information to identify students' strengths and needs involves the use of a broad range of formal and informal assessment approaches. Formal assessments can include standardised assessments, accessing external agencies to provide an assessment, and assessments such as those that focus on developmental and adaptive functioning skills.

Informal assessments can include criterion-referenced assessments, teacher-designed assessments or any assessment that is individualised and targeted to identify a student's strengths and specific areas of need. Feedback and advice from external agencies on school-based assessments can also be sought to support the identification of the student's profile. Using a broad range of assessment approaches is necessary as the student may present with needs across a number of areas and they may be inter-related. Using the information from different sources assists with the creation of a student's profile, which provides the evidence to support the decision for a student to access a SCL2LP or SCL1LP.

The short-term and long-term goals that form part of the Student Support Plan (SSP) are included in the overall SSF. The SSF is a live, workable document that is used to facilitate and support tracking of student progress and their transfer from junior cycle to the most appropriate programme for the student at senior cycle and beyond school.

Prior to making the decision that a Level 1 or Level 2 Senior Cycle Learning Programme is suitable for a specific student, schools will engage in a robust, collaborative information-gathering process.

Mainstream post-primary schools will be guided by the Continuum of Support Framework to collect and collate information and documentation from the student's special education teacher, class teachers, parents and external professionals, as relevant.

The SSF in every school context helps ensure that there is an appropriate progression plan for the student, following completion of their junior cycle programme. This includes a plan for senior cycle and transition to the world of work, occupation(s), study or further services beyond school. This information is also recorded in the student's SSF.

The following questions are useful to consider when identifying the senior cycle programme most suitable to a student:

1. Has the student completed or engaged with Level 1 or Level 2 junior cycle programmes? What other programmes, subjects or short courses has the student engaged with as part of their junior cycle education?

2. Is a professional report available and/or do the student's school-based assessments consistently fall significantly below the average range of scores? School based assessments are those outlined by the Department of Education (DE) recommended list of assessments: Approved List of Assessments

3. Have the student's class teachers provided evidence that the student has significant difficulty in accessing the learning in the curriculum at Level 3 in junior cycle, despite support being provided to the student?

4. Has the SCL2LP and SCL1LP been explained in detail and discussed with the student and parents/guardians to consider their views?

5. Has the school consulted with the student and parents to capture their views on progression in senior cycle and their transition beyond school to adult services, further education or employment?

6. If the student has already progressed to senior cycle, have the student's class teachers provided evidence of all the supports they have provided to the student to enable them to access the curriculum; and evidence that the student cannot access the learning in their particular class/subject at Levels 4 – 5?

7. Have the views and wishes of the student and their parents/guardians been captured and recorded in the SSF?

8. Has the student given their assent and their parents/guardians given written consent to engage with the SCL2LP or SCL1LP?

Further Information and Supports

The Department of Education's Special Education Teacher Allocation Model: Guidelines for Post Primary Schools provide further information on the SSF and identifying needs

Further information on the Continuum of Support for Post-Primary schools is available from the Department of Education and the National Educational Psychological Service (NEPS).

Information on Student Support Files, assessment of needs and access to and allocation of resources for special educational needs (SEN) is available from the National Council for Special Education.

Information on professional development and support services for teachers and school leaders is available from Oide.

Key competencies

Key competencies is an umbrella term which refers to the knowledge, skills, values and dispositions students develop in an integrated way during senior cycle.

Figure 1: The components of key competencies and their desired impact

These competencies are linked and can be combined; can improve students' overall learning; can help students and teachers to make meaningful connections between and across different areas of learning; and are important across the curriculum.

LITERACIES AND NUMERACY

Thinking and solving problems

Managing learning and self

Being creative

KEY COMPETENCIES IN SENIOR CYCLE

Cultivating wellbeing

Communicating

Participating in society

**Working with others**

LITERACIES AND NUMERACY

Figure 2: The key competencies at senior cycle

These competencies are linked and blend together; can improve students' overall learning; can help students and teachers to make meaningful connections between and across different areas of learning; and are important across the curriculum.

The development of students' literacies and numeracy contributes to the development of competencies and vice-versa. Key competencies are supported when students' literacies and numeracy are well developed and they can make good use of various tools, including technologies, to support their learning.

The key competencies come to life through the learning experiences and pedagogies teachers choose and through students' responses to them. Students can and should be helped to develop their key competencies irrespective of their past or present background, circumstances or experiences and should have many opportunities to make their key competencies visible. Further detail in relation to key competencies is available at NCCA Redevelopment Senior Cycle

Senior Cycle Level 1 and Level 2 Learning Programmes: Programme requirements

The SCL1LP and SCL2LP consist of a range of curriculum areas, each designed on a modular basis. A specification is provided separately for each curriculum area and its associated modules. In the case of each module, the specification includes learning outcomes which describe the knowledge, skills, values and dispositions students should be able to demonstrate after completing the module. Each specification also includes information to support the assessment of the learning outcomes.

While the curriculum areas and modules are presented as self-contained units, it is intended that when used in learning programmes they will be integrated into and developed in a wide range of learning contexts and settings. Fostering awareness in the student of connections between what they are experiencing and learning in one curriculum area and another curriculum area, or module, is an integral element of personal growth and contributes significantly to the ultimate aims of supporting lifelong learning and independent living into adulthood.

Level 1 Senior Cycle Learning Programmes

Across junior cycle and senior cycle, the Level 1 programmes emphasise that learning for the students in question:

- focuses on the student's communication, cognitive, life and functional skills as well as sensory needs that underpin all future learning

- must be meaningful and interesting for them, offering opportunities for them to build on what they can do as well as supporting their identified area(s) of need

- is planned through a holistic approach and takes account of the student's preferred sensory and learning channels and their ways of processing information.

There are four curriculum areas at the heart of the SCL1LP. These curriculum areas are designed on a modular basis and explicitly identify and develop the key areas of learning needed to support students during their time in school, at home, in engaging with their community and to help prepare them for their future lives.

When designing a SCL1LP for a student, teachers and school management should ensure that the student engages with modules from across all four curriculum areas. Within the modules, teachers should ensure that the learning outcomes engaged with by the student build on their strengths, their interests, and support their identified areas of need. Students can engage with learning outcomes at a level and pace commensurate to their ability and identified needs. While a student may not fully realise or achieve an individual learning outcome, they should still be encouraged and supported to make incremental progress within each module.

Each module is designed for approximately 40 – 60 hours of teaching time/class contact time. However, this is not prescriptive as schools are best placed to decide the most appropriate allocation of time per module based on a student's needs and their own school context. The table below outlines the four curriculum areas at the heart of the SCL1LP.

Curriculum area	Number of Modules	Recommended hours per module	Recommended hours over two years
Numeracy	4	40	160
Communication and Literacy	3	60	180
Personal care	3	60	180
Electives	5	60	300

Table 1: Structure of the Level 1 Learning Programme at senior cycle

With regard to electives, options include:

- Physical Education
- Music
- Visual Art
- Drama
- Being part of the community
- Special Interest
- Looking after my environment.

Learning in SPHE is provided to students through the curriculum area of Personal Care. Schools may also provide a separate religious education/ethical/multi-belief programme in accordance with their ethos. Guidance and classroom support on future pathways should also be provided to students as part of their programme.

Level 2 Senior Cycle Learning Programmes

There are four curriculum areas at the heart of the SCL2LP. These curriculum areas are designed on a modular basis and explicitly identify and develop the key areas of learning needed to support students during their time in school, at home, in engaging with their community and to help prepare them for their future lives.

When designing a SCL2LP for a student, teachers and school management should ensure that the student engages with modules from across all four curriculum areas. Within the modules, teachers should ensure that the learning outcomes engaged with by the student build on their strengths, their interests, and support their identified areas of need. Students can engage with learning outcomes at a level and pace commensurate to their ability and identified needs. While a student may not fully realise or achieve an individual learning outcome, they should still be encouraged and supported to make incremental progress within each module. The table below outlines the four curriculum areas of the Level 2 programme.

Curriculum area	Number of Modules	Recommended hours per module	Recommended hours over two years
Numeracy	3	60	180
Communication and Literacy	4	60	240
Personal Care	1	60	60
Electives	7	60	420

Table 2: Structure of the Level 2 Learning Programme at senior cycle

With regard to electives, options include:

- Preparation for life after school
- IT skills
- Cooking
- Music
- Drama
- Visual Art
- Literature
- Physical Education
- Looking after my environment
- Design for sustainable living
- Special interest
- The past in my place
- My life, my finance.

Each module is designed for approximately 60 hours of teaching time/class contact time. However, this is not prescriptive. The hours indicated are guidelines, as schools are best placed to decide the most appropriate allocation of time per module based on a student's needs and their own school context.

Learning in SPHE is provided through the module on Personal Care and the Senior Cycle SPHE specification. Further information will be provided when work on the Senior Cycle SPHE curriculum is completed. Schools may also provide a separate religious education/ethical/multi-belief programme (so that it aligns with what is included in the L1 programme). Guidance and classroom support on future pathways should also be provided to students as part of their programme.

Planning for the Learning Programmes

Leadership and management

The SCL1LP and SCL2LP have been designed with sensitivity to the variety of contexts in which the student may be attending - post-primary mainstream school, special class in mainstream school or special school. Senior management in schools can support a student's holistic development by providing a broad range of curricular, co-curricular and extra-curricular opportunities for all students.

The enactment of Senior Cycle Level 1 and Level 2 Programmes in all settings is supported:

- when there is active commitment and support from the whole school community

- by effective communication and collaboration between management, staff, parents/guardians, students and other professionals in matters relating to the programmes

- when school leaders and teachers' professional learning is promoted

- by cultivating opportunities for co-operation and involvement with the local community.

Organising the Learning Programmes

As the learning programmes are personalised, organising the programme should revolve around the individual student Using the student's Student Support File, the student's strengths and specific needs should be identified in consultation with parents/guardians, teachers and the student themselves, where possible.

To assist in planning the student's learning programme, Figure 4 offers a schema that outlines the different aspects of the learning programme.

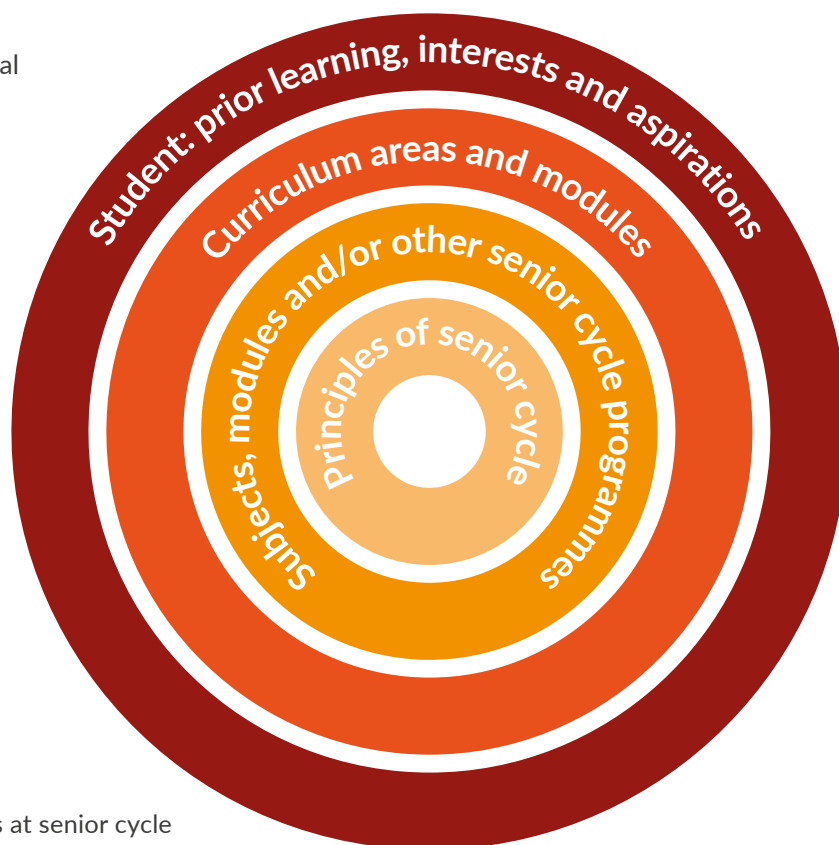

Figure 4: Schema for planning learning programmes at senior cycle

In addition, the following steps will assist schools when planning a learning programme for a student following a Level 1 and Level 2 LP in senior cycle:

- Establish a baseline for learning by identifying what the individual student has already learned. The student's prior learning, special interests, information in the SSF, future aspirations, including transitions beyond school, need to be considered at this stage.

- Identify and select the most appropriate learning within each curriculum area and module for the individual student and consider opportunities for developing key competencies across these modules.

- Select the most appropriate site for learning for the student. This should include careful consideration of the range of timetabled LCE and LCA subjects, learning programmes and modules, as well as other school, and off-site activities, that may offer a variety of experiences through which the student can achieve the learning outcomes of their SCL1LP or SCL2LP.

Each programme is designed on a modular basis to support integration into, and implementation within, existing school structures and contexts, and as appropriate for the identified individual strengths and needs of the student in so far as possible. Cross curricular links across the student's learning programme should also be developed.

Schools should consider a combination of timetabling approaches to maximise flexibility to the most effective and efficient use of resources within their own context. While the students may pursue SCL1LP or SCL2LP alongside students pursuing a curriculum at other levels, the learning should be appropriate to the student's identified individual needs and strengths. In a mainstream post-primary setting, collaboration and consultation between the SET team and the class teacher is essential. Allocation of any resources from within the school's SET allocation, should be in line with the guidelines supporting SET allocation and should be within the remit of addressing the student's individual identified learning needs.

There is no single approach to timetabling which will address every context. School autonomy is encouraged as each school has a unique cohort of students with their own strengths and needs. Some students may have physical, medical as well as cognitive needs. If this is the case, these needs will be prioritised when the school is planning the student's learning programme. There are other timetabling considerations such as Guidance (if available), Social Personal and Health Education (SPHE), Physical Education (PE) and Religious Education (as appropriate).

It may not be possible to complete some modules in the SCL1LP and SCL2LP over one year, in which case, the module may extend over two years.

Work experience is an important aspect of senior cycle education as it supports many students on their progression pathways after senior cycle. Work experience is encouraged for students, but is most beneficial when it is appropriate and meaningful for the student's needs, interests and ambitions.

Preparation for Teaching and Learning

Students should be given opportunities to demonstrate how learning acquired in modules can be linked to prior learning, and to other modules, to reinforce and progress all learning. However, these opportunities may require varying degrees of scaffolding as each student's learning will be dependent upon the activity and their individual social, communicative and cognitive skills.

Ongoing assessment is an integral part of teaching and learning. When planning for teaching and learning each teacher should establish the student's prior knowledge and understanding of the module, identify the learning outcomes the student should try to achieve and what approaches can enable the student to progress their learning. Ongoing assessment can help the teacher to establish how well the student progresses in their learning.

Engagement with learning activities designed to achieve a learning outcome(s) will vary from student to student. When designing learning activities based on learning outcome(s), teachers should place their individual student(s) identified strengths and needs at the centre of the process. Initially, some students may not engage with the learning but through scaffolding, differentiation and at times, repetition, students can be supported to improve their engagement with the learning activities. Progress can be complex and not always linear. Students engage with learning differently, depending on a number of factors including context and timing. Students may communicate their learning in a variety of ways, including gestures, eye movements, vocalisations, Lámh, gestures or use other visual supports to communicate.

Each student's SSF should provide information to help teachers in designing learning experiences based on their student's identified strengths and needs. Learning experiences should also include targets from the student support plan (SSP) which may be achieved through the student's learning programme and daily school routine.

Learning experiences and tasks that relate to real world experiences and/or draw on concrete, physical demonstrations of real-world scenarios can promote, progress and reinforce students' understanding and learning. The use of concrete manipulatives, materials and role play, where appropriate, is also encouraged.

Teachers can use the classroom, the whole school environment, the student's home and the wider community as sites of teaching, learning and assessment.

Additional considerations when planning for teaching and learning include:

- Identifying opportunities to focus on developing the student's understanding of the world around them, including social, communication and life skills.

- Providing the student with opportunities to develop their digital literacy skills to further support their learning.

- Identifying opportunities to build on prior knowledge and enhance their sense of achievement and motivation

- Providing the student with opportunities to use digital technology can enhance student learning.

Progression continuum for ongoing assessment

The modules and learning outcomes in the SCL1LP and SCL2LP are designed so that each student can progress their social interactions, their communicative interactions and their cognitive skills commensurate to their own ability.

It is helpful to consider a student's learning being on a continuum and happening over time and that learning is more than an episodic event. To support the teacher in identifying if and to what extent the student is making progress across the modules and learning outcomes, the progression continuum is provided. Movement within the progression continuum may take longer and progress may be more variable depending on the student's strengths and needs. To allow for progression at different rates, students should not be expected to achieve outcomes by a predetermined point in time.

The progression continuum tables (see Table 3 for Level 1 and Table 4 for Level 2) indicate where the student's progress is in relation to the learning outcomes. The progression continuum may be used to support teaching, learning and ongoing assessment in the student's daily activities.

Level 1 Progression continuum

Attend	Student attends and is present at the learning activity or event.
Recognition	Student shows an awareness of, or recognition of, the learning activity/event including a fleeting focus.
Attention	Student pays attention to the learning activity/event but it can be inconsistent and often brief.
Acknowledgement	Student begins to respond to, or acknowledge the learning activity/event, often inconsistently and the response is appropriate to the student.
Engagement	Student shows more consistent attention to learning activities/events.
Involvement	Student begins to share, take turns, show enjoyment of the learning activity/event, express choice.
Anticipation	Student begins to anticipate familiar learning activities/events.
Action	Student joins in, gestures, vocalises on learning activity and others, appropriate to the student's form of communication.

Table 3: L1SCLP Progression continuum

The student may also show progress through:

- higher levels of enjoyment of the activity

- increased use of senses; from nearby senses such as tactile to more distant senses such as visual or auditory senses

- increased use of movement such as body language right through to the use of visuals.

Progress can also be shown by movement. Students may progress from showing resistance through movement to enjoying their interactions, such as:

- a reduction in intervention, support or reinforcement

- when a student demonstrates the achievement more than once

- when a student combines skills or uses skills across contexts

- when a student decides not to respond, having previously done so, is a sign of progression in itself.

Level 2 Progression continuum

Engagement	The student is at an acquiring stage where they are beginning to engage with the learning outcomes.
Advanced Engagement	Through repetition and support, the student can achieve the learning outcomes.
Competency	The student can achieve the learning outcomes independently on several occasions.
Advanced Competency	The student is maintaining their level of achievement with the learning outcomes. They can achieve the learning outcomes even after a break or change.
Proficiency	Student can apply their learning in different contexts, scenarios, with different stimuli and people.
Expertise	Student will adapt their learning emerging from learning outcomes to understand or problem solve in new contexts and scenarios.

Table 4: SCL2LP Progression continuum

Communication with parents and guardians

Parents/guardians are key partners in supporting a student to successfully engage with their learning programme. Therefore, it is important to ensure that parents/guardians and students are directly involved in the decision-making process of a student pursuing a SCL1LP or SCL2LP.

When the decision is made for a student to pursue a SCL1LP or SCL2LP, it is equally important to establish and maintain constructive relationships with parents/guardians as a means of supporting a student's learning and wellbeing.

There should be regular opportunities for reporting on students' progress and achievements to parents/guardians. This reporting should align with reporting practices within the school setting while focusing on the individual nature of the student's learning and achievements.

Continuity, progression and pathways

Progression and pathways will, and should, be unique to each student pursuing the Level 1 or Level 2 programmes at senior cycle. Continuity between the Level 1 and Level 2 programmes at senior cycle and the junior cycle L1LPs and L2LPs has been fostered through the design of the curriculum areas and modules.

As the student engages in senior cycle, schools should ensure that they are planning the student's individual pathway in conjunction with the student, parents/guardians and teachers. As students progress to life beyond school they may enter the world of work, occupations, further education and training or an alternative, post-school setting

Assessment

Assessment in senior cycle involves gathering, interpreting, using and reporting information about the processes and outcomes of learning. It takes different forms and is used for a variety of purposes. It is used to determine the appropriate route for students through a differentiated curriculum, to identify specific areas of strength or difficulty for a given student and to assess and certify achievement. Assessment supports and improves learning by helping students and teachers to identify next steps in the teaching and learning process.

Assessment in the Level 1 and Level 2 senior cycle learning programmes is a dynamic form of assessment and is presented in a way that is personal to the student. Assessment will indicate and capture the reality of students' daily lives. Assessment will be an ongoing blend of summative and formative assessment. Home and community are also considered as sources of authentic, vital and rich assessment information.

Assessment for certification

The evidence of learning for the Level 1 and Level 2 programmes at senior cycle will be gathered in a portfolio, which will be presented for assessment for certification. The learning recognised for certification will be at Level 1 and/or Level 2 of the National Framework of Qualifications (NFQ). Each module completed by the student will be certificated by the State Examinations Commission (SEC)

Assessment Criteria are the criteria through which the student's work is assessed. These set out what the evidence should include to demonstrate that the student has successfully achieved the relevant learning outcome/s. The Assessment Criteria for each curriculum area/module will be developed by the NCCA and the SEC in consultation with teachers and presented in *Guidelines to support the assessment of Senior Cycle Level 1/Level 2 Learning Programmes*.

Gathering evidence for assessment for certification

Evidence of learning can be generated through a wide range of assessment methods and in a variety of forms. Sometimes evidence of learning can be captured by someone other than the teacher, especially when the evidence of the student's learning is being demonstrated outside the classroom. This might include accessing the voice of a parent/guardian, therapist, SNA or other professional working with the student. Evidence of the learning observed or gathered by others should then be assessed and recorded by the teacher prior to including it in the student's portfolio.

Students may demonstrate learning in school, classroom or wider school community. Providing parents/guardians and students with opportunities to give feedback on learning outcomes achieved within their home or in the wider community with their friends and family is also valuable as learning is not limited to the classroom.

Student Portfolio

The evidence of learning and achievement relating to the student will be gathered on an ongoing basis to create the student's portfolio.

A portfolio can be in hard copy and/or electronic form. An electronic portfolio, also known as an e-portfolio or digital portfolio, is a collection of a student's work created using word processing and other multimedia presentation.

Portfolios, either e-portfolio or paper based, provide students with concrete evidence of their progress and achievements; they give the teacher and student the chance to develop a comprehensive

profile showing the student's achievements at senior cycle. Each portfolio is individual and reflects the student themselves.

It would be useful to allow parents/guardians to have viewing access to the portfolio.

The portfolio may contain evidence of learning for a student that may have taken place individually or in a group or whole class setting. Evidence within a portfolio can cover a range of achievements, including practical tasks, demonstration of skills, and work placement achievements.

Types of evidence within a portfolio can include, but is not limited to:

- Photographs of work completed by the student
- Photographs or videos of interactions with teachers, SNA, parents or members of the community
- Work samples- written work
- Project work both written and online
- Homework
- Charts, diagrams
- Audio recording or video recordings
- Other multimedia elements
- Student diary entry
- Teacher diary entry.

Students may already have developed the practice of collating a portfolio as part of their junior cycle programme. The portfolio is an evolving record of the student's work which will enable the teacher to track progress. Good practices established for gathering evidence at junior cycle can be continued into senior cycle.

Assessment Criteria

Assessment Criteria are the criteria through which the student's work is assessed. Teachers use Assessment Criteria to decide the Descriptor of Achievement. The Assessment Criteria for each curriculum area/module and Descriptors of Achievement will be developed by the NCCA and the SEC in consultation with teachers and presented in *Guidelines to support the assessment of Senior Cycle Level 1/Level 2 Learning Programmes*.

When using the Assessment Criteria to assess the level of student achievement in a module, teachers use 'on-balance' judgement. The teacher should read the Assessment Criteria until they reach a criterion that best describes the evidence of learning of the student in the module being assessed for senior cycle certification purposes. While it should be noted that none of the criteria imply faultless achievement, evidence of work for certification should closely match the criterion for that descriptor of achievement within the Assessment Criteria. Where it is not clearly evident which criterion should apply, teachers must come to a judgment, based on the evidence from the student's work, to select the criterion that best matches the student's work overall. This 'best fit' approach allows teachers to apply the criterion that 'on balance' describes the work being assessed.

Assessment using the Assessment Criteria is similar to the ongoing assessment that occurs every day in class and, while for certification purposes, can be viewed and used as part of teaching and learning as well as for senior cycle assessment purposes.

Reviewing assessment and learning

Quality assurance measures will be implemented through internal and external validation.

Internal validation

Assessment review meetings provide a means for internal validation. They enable teachers to collaboratively reach consistency in their judgments of student work against assessment criteria. The review process is centred on teachers discussing student work at structured meetings. The collaborative approach will play an important role in helping teachers to develop an understanding of standards and expectations by enabling them to reflect on the evidence of students' work and to share the learning and teaching strategies supporting that work. The objectives of the review process are to achieve:

- greater consistency of teachers' judgements

- greater alignment of judgements with expected standards

- and to assure parents/guardians and others that students are receiving appropriate recognition of their achievements in line with standards and expectations.

Further information on supports for the internal validation process will be provided during the implementation of the Learning Programmes.

External validation

The SEC will perform the external validation role, as described below, and will be the awarding body for certification purposes. It is proposed that an external validation system will be provided to schools, which is essential to ensuring the quality and integrity of the assessment processes for certification purposes. It will be the role of the SEC to review the internal validation report to ensure that assessment has been undertaken in a quality assured manner. External validation may include a sample-based approach that would involve a review of a selection of student portfolios.

Students will receive certification after an assessment and validation process, which is obtained when the SEC has confirmed that the assessment has been carried out satisfactorily by the school.

Appendix 1 Glossary of action verbs

This glossary is designed to clarify the learning outcomes of the Level 1 Learning Programme and Level 2 Learning Programme at senior cycle.

Action verb	
Attend	Direct attention (visual/tactile/auditory) to focus on a person, object or stimulus
Ask	Establish/find out
Calculate	Obtain a numerical answer, showing the relevant stages in the working
Check	Compare with the choices of others
Choose/ Make choices	Indicate a preference from given options using any text
Clarify	Express and justify choices
Communicate	Vocalise, make gestures, move eye gaze or use of text to convey a message
Compare	Express the similarities and/or differences between two or more items or situations
Connect	Compare, express in equivalent terms and order
Contrast	Implies presenting two different perspectives or positions and showing the differences
Construct	To make or form by combining or arranging parts or elements
Correct	Address errors
Count	There are five principles of counting: one-one, stable order, cardinal, order irrelevance and abstraction. The last number in the count indicates the quantity in a set
Create	Be involved in the process of making something new
Demonstrate	Show an awareness, skill, or understanding
Describe	Develop a detailed picture or image of, for example, a structure or a process, using words or diagrams where appropriate; produce a plan, simulation or model
Develop	Progress or improve to become more mature, advanced, or elaborate
Distinguish	Recognise the difference between persons, context, concept or object
Draw	Track the movement of objects or uses concrete manipulatives to explore structure or pattern
Engage	Become involved in a task/process (through looking, touching, smelling, listening or tasting)
Employ	Respond to and to communicate with
Estimate	Give an approximate value. Evaluate conclusion in an inquiry or investigation; identify the limitations of data in conclusions; make judgments about ideas, solutions or methods
Experience	Participates in activities
Evaluate	Conclusion in an inquiry or investigation; identify the limitations of data in conclusions; make judgments about ideas, solutions or methods
Explore	Use the senses (in terms of touch, taste, sound, sight etc) to inquire into an item/concept/activity. The student may make new discoveries during this process

Action verb	
Express	Convey a feeling, opinion or message through any text*/reactive changes in behaviour
Extract	To get, pull, deduce, draw out, usually with special effort, skills or force
Follow	Adhere to rules/conventions specific to an environment or activity (e.g. slowing down from a run to a walking pace in a supermarket in response to the teacher giving the instruction verbally and showing a 'walking' symbol)
Give	To present voluntarily to or produce something, or to hand something to somebody
Handle	Explore an item through touching/feeling it in some way. This may involve body parts other than the student's hands (e.g. feeling fur rubbed on their arm/cheek) if necessary to support the student's physical or sensory needs
Identify	Locate and/or specify who or what a person, object or stimulus is
Indicate	Change behaviour in a way that identifies/communicates a response to an object, person, environment or stimulus using any text*. This may or may not be intentional communication (e.g. crying in response to a loud noise)
Increase	Show an understanding in the difference of value
Initiate	Start something. A student that initiates communication/interaction with someone may do so in a wide variety of ways including seeking eye contact, reaching out to the person, vocalising or touching a familiar object of reference
Interact	Experience having an effect and/or being affected by an exchange with another person
Interpret	Communicate an understanding of information, knowledge or skill.
Listen	Focus auditory attention on the experience of sounds. Students may not always pay visual attention to the sound source
Locate	To discover the exact place or position of; situate in a particular place and/or within a particular context
Maintain	Keep, reflect and/or review
Measure	Demonstrate an awareness that attributes such as length, weight, capacity and area can be measured and compared
Move	Change position in space with or without support
Name	Recognise according to their part-whole relationships
Order	Compare and order things by how much of a particular attribute (physical quantity) they have relative to each other. Attributes are compared and ordered using units of measurement
Know	To have information, understanding, or familiarity with something or someone
Participate	Demonstrate engagement in the learning activity
Plan	To devise or project a method or a course of action
Predict	Indicate an awareness/knowledge of what will come next based on previous learning and experiences (e.g. when the teacher reaches into a bag of props at a certain point in a familiar story, the student reacts by screwing up and moving their face in anticipation of a water spray that is used at this point of the story)
Prepare	Make something ready for use or presentation

Action verb	
Present	Promote or propose an idea; deliver or illustrate evidence; show something for others to examine
Provide	To give someone something they need
Purchase	Attend to situations where objects are exchanged for money
Read	Extract meaning from and demonstrate understanding of any form of text (e.g. looking at an object of reference for 'snack' then immediately turning head towards the snack cupboard expectantly)
Recognise	Demonstrate an understanding of familiarity with persons, context, concept, or object
Record	To keep information for the future either by writing it down or storing it digitally
Represent	Show information in different ways
Refine	Improve an idea, method, system by making small changes
Request	ask for something in an appropriate manner
Respond	Change behaviour in some way (movement/shift in eye gaze/respond verbally/communicate through text/demonstrate emotions etc) in reaction to something or someone
Round off	Estimation and rounding can help judge the reasonableness of transactions
Seek	Search for/look out for something. This requires the student to focus on the activity/task with intention and purpose
Select	Make a choice and/or make use of
Sequence	A list of object or actions that follow an order. Events in daily routines can be described and sequenced. A timetable is a useful display to show when things happen
Show	Express awareness, understanding, knowledge or feelings through actions
Sort	Objects and sets can be sorted according to one or more attributes
Understand	Interpret and apply learning in a specific context
Undertake	Experience and/or engage in role play activities
Use	Apply sensory awareness/skills/learning to a practical setting for a given function
Write	To make letters, words, numbers or symbols on a surface with an instrument such as a pen or pencil or digital instrument
