What is a community of practice?

"Communities of Practices are groups of people who share a passion for something that they know how to do and who interact regularly to learn how to do it better."

(Etienne Wenger, 2000)

What is a community of practice?

"The idea behind a Community of Practice is based on the view of learning as a social process that involves the whole person. Within a Community of Practice, every person is encouraged to take part to whatever extent they feel comfortable with. Overtime, the knowledge and experience within the community grows."

(Lave and Wenger, 1991)

Learning Intentions

- To explore terminology from the Climate Action and Sustainable Development specification
- To increase teacher confidence in engaging with the learning outcomes

Terms

1. Anthropocene
2. Biodiversity loss
3. Misinformation
4. Greenwashing
5. Climate mitigation
6. Climate debt
7. Just transitions
8. Carbon sequestration

Teacher Activity

In your Breakout Room, you will:

- Explore your understanding of the concepts that were shared
- Engage with the resources provided, to clarify any gaps in knowledge
- Identify which learning outcomes from the specification are associated with those concepts
- Produce a bitesize explanation of the terms, using student-friendly language

Biodiversity Loss

Biodiversity Loss

canva.com

Biod (Whiteboard)

Biodiversity refers to the variety and variability of life forms within a given ecosystem, region, or on the entire planet. It encompasses the diversity of species, genetic variation among individuals within those species, and the ecological complexes they form. Biodiversity is essential for ecosystem resilience, providing vital services such as pollination, nutrient cycling, and climate regulation, and it contributes to the overall health and stability of the environment.
